Risk Group Reduction

Complete Workforce Training

At CybeReady, we firmly believe that cybersecurity professionals should have the tools to measure and demonstrate a significant return on investment (ROI) for their employee training initiatives. This conviction led us to create a training program that assures risk reduction within six months of deployment.

When surveying data from 300 of CybeReady's corporate customers, we noticed a significant increase in Employee Resilience (4x), along with an 80% decrease in the high-risk group of employees (those most susceptible to clicking on phishing emails) across all company sizes.
